github.com/Iam-Grim-Reaper

SUMMARY

AI Software Engineer experienced in building Generative AI applications, agentic RAG systems, and computer vision solutions. Skilled in Python, FastAPI, LangGraph, and backend development, with hands-on experience in intelligent retrieval, AI integration, and scalable application engineering.

TECHNICAL SKILLS

Programming: — Python, JavaScript, TypeScript, SQL, PHP

Generative AI & LLMs: — RAG, Agentic Workflows, LangGraph, Google Gemini, Embeddings, Hybrid Search, Reranking

Machine Learning: — TensorFlow, Keras, Scikit-learn, OpenCV, ONNX Runtime, NLP, Computer Vision

Backend & Frontend: — FastAPI, REST APIs, React.js, Next.js, HTML, CSS

Databases & Vector Stores: — PostgreSQL, MySQL, Neo4j, Qdrant, FAISS

Tools & Infrastructure: — Git, GitHub, Docker, Linux, Bash, NumPy, Pandas

INTERNSHIPS

AI Intern, *Altaric Consulting* Sep 2026 – Present | Hyderabad, India

Project: AI-Powered Social Discovery & Meetup Platform

- Integrated AI-assisted profile photo verification services into Bar Buddy, connecting image validation, verification tokens, and account-bound verification controls with application workflows.
- Engineered backend services using Python, FastAPI, PostgreSQL/PostGIS, Valkey, and REST APIs, supporting authentication, session management, database migrations, and API integration.
- Built and enhanced core application features across Discover, Profiles, and Plans & Meetups, including personalized discovery, invitations, join approvals, notifications, and privacy controls.
- Strengthened application security through fail-closed verification, token hardening, user-block enforcement, and protection of sensitive profile information.
- Currently developing a live face-verification workflow incorporating liveness detection and 1:1 facial matching to verify user identity against registered profile photos.

AI Project Intern, *ISRO, National Remote Sensing Centre (NRSC)* Sep 2025 – Dec 2025 | Hyderabad, India

Project: Smart Face Recognizer for Employee Archival System

- Designed a high-performance InsightFace facial recognition pipeline, integrating OpenCV, Pillow, and NumPy for optimized preprocessing, alignment, and embedding generation.
- Implemented multi-threaded CPU micro-batching with checkpoint recovery, enabling scalable, resumable processing and improving CPU inference through OpenMP and MKL optimization.
- Built a MySQL-backed pipeline for match persistence, performance tracking, logging, and data integrity validation.
- Collaborated with NRSC AI engineers to optimize embedding distance metrics and recognition thresholds, reducing false positives and improving system accuracy.

HR Intern, *WoW HR* Jun 2024 – Aug 2024 | Hyderabad, India

- Coordinated recruitment, interview scheduling, and candidate communication while supporting DEI initiatives, employee engagement activities, and HR operations.

PROJECTS

TraceGraph AI

- Developed an AI-powered document research platform combining Retrieval-Augmented Generation (RAG), hybrid search, and knowledge graphs for context-aware question answering.
- Designed LangGraph-based agentic workflows for adaptive query routing, multi-step retrieval, answer generation, and response verification.
- Integrated Qdrant and Neo4j for vector and graph-based retrieval, implementing cross-encoder reranking to improve evidence relevance.
- Built a full-stack application using FastAPI and Next.js, supporting document ingestion, real-time streaming chat, and source-backed responses.

Histopathology Driven Detection of Lung and Colon Cancer

- Developed an AI-based cancer detection system for lung and colon histopathology images using ConvNeXt-Small, transfer learning, and Macenko stain normalization with leakage-free data preprocessing.
- Implemented pHash/SSIM de-duplication, Grad-CAM explainability, and evaluated performance using F1-score, AUROC, ECE, and confusion matrices.
- Deployed the model using ONNX, INT8 quantization, and a REST API for efficient inference with class probabilities and heatmap visualizations.

CERTIFICATIONS

Machine Learning Foundations – AWS Academy — Oct 2024

Computer Vision 101 – Infosys Springboard — Oct 2025

Introduction to Natural Language Processing – Infosys Springboard — Oct 2025

EDUCATION

B.Tech in Artificial Intelligence, *Vidya Jyothi Institute of Technology* Oct 2022 – May 2026
CGPA: 8.01

Intermediate, *Sri Chaitanya Junior College* Sep 2020 – May 2022
Percentage : 84.1%

Matriculation, *Sri Chaitanya Techno School* Jun 2019 – May 2020
GPA : 10.0

ACHIEVEMENTS & EXTRACURRICULARS

- First Prize, Ideathon – ARKA 2023 (KLH GBS)
- Club Architect & Ambassador, NIRMITI – VJIT
- Placement Coordinator, Vidya Jyothi Institute of Technology
- Gold Medalist, Shot Put & Volleyball (Inter-school)
- Smart India Hackathon 2023 Finalist
